

Registering a Cisco Edge 340 media player

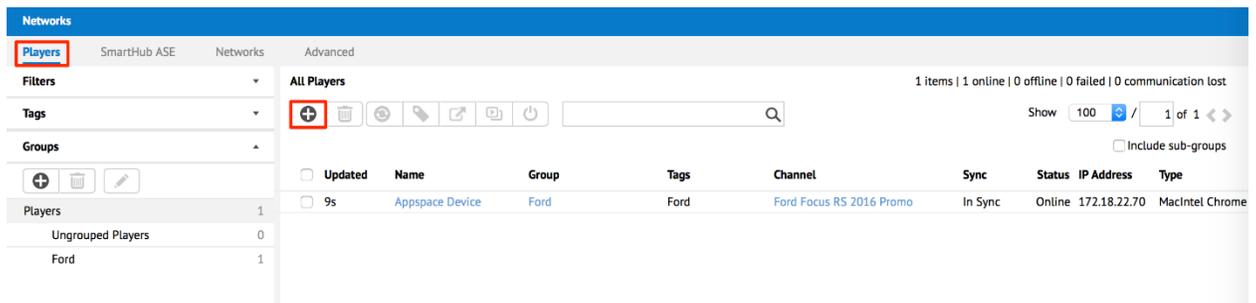

Registering Edge 340 with Online Registration Tool

Warning

The Online Registration Tool does not work on Chrome and Firefox web browsers, as the NPAPI plugins that are required by the tool to communicate with the devices on the local network are disabled by default on these browsers. Please use Internet Explorer 11 instead.

Follow the instructions below to register Edge 340 with the Online Registration Tool:

1. Click the Appspace menu and select Admin > Networks. Select the Players tab and click the Register Player button.

2. Select Manual Registration, and select Cisco Edge from the device drop-down menu.

Register a new device

Enter a registration code **Manual registration**

Select device

3. Select Online Registration.

Register Edge 300 / 340

Choose Operation

Online Registration

Use the online registration tool to register one or more players in the network. Please note that you must have the Java runtime installed for this registration method to work.

Edge 300 / 340 Wizard

The Edge 300 /340 Wizard is available from the downloads page and allows administrators to register and configure an Edge 300 / 340 from a single and easy to use Windows desktop application.

4. Input the values for the various fields such as device IP, content delivery method, and device credentials. When finished, click Scan Devices to begin the device search.

Register Player close window

Online Registration

Online Cisco Edge 300/340 registration uses your browser to connect to one or more Cisco Edge 300/340 to register the device(s) with your Appspace account. The tool requires that you have the Java runtime installed and your browser allows Java applets to open. Complete the details below and click Scan Devices

Number of Device(s) to register One

Device IP 172.18.13.41

Request timeout 1 second

Device(s) SSH Credentials Your Edge device(s) must have the same username and password in order for successful discovery

Devices	Username	Password
Edge 300	<input type="text" value="root"/>	<input type="text"/>
Edge 340	<input type="text" value="root"/>	<input type="password" value="*****"/>

Scan Devices

Note

An IP range may be used in the Device IP field to find multiple devices.

5. All the Edge 340 devices found within the defined IP range are displayed. Select the check box of the devices you wish to register, and click Register Device. This process will take a few minutes depending on the number of devices selected.

Appspace DMP Wizard Register and configure Cisco DMP 4400 and DMP 4310 devices to sync and run Appspace applications.	5.0.3	wizard dmp	December 1, 2014	Download
Appspace Edge 300 Wizard Register and configure Cisco Edge 300 devices to sync and run Appspace applications.	5.4.0	wizard edge300	November 28, 2014	Download
Appspace Edge 340 Wizard Register and configure Cisco Edge 340 devices to sync and run Appspace applications.	1.0.3	wizard edge340	November 28, 2014	Download
Appspace Installation Center Installer to configure Windows Server to host Appspace suite on your premises.	5.5.5	appspace installer	September 19, 2015	Download

- Right-click the installer file (.msi) and Run as Administrator.
- Once the installation has completed, an Appspace Edge 340 Wizard shortcut icon will be placed on the desktop. Double-click the shortcut icon to run the wizard.

4. Input the URL and credentials as per your Appspace deployment type, and click Next:

A screenshot of the 'appspace edge 340 wizard' configuration window. The window title is 'appspace' and the version is '1.0.11'. The form contains three input fields: 'Appspace Core' with the value 'http://onprem.server.website.com', 'Username' with the value 'tina@appspace.com', and 'Password' with masked characters '*****'. A 'Next' button is located at the bottom right of the form area.

- **On-Premises** - Use the URL of your Appspace on-premises server. Example:
 - `http://onprem.server.website.com`
 - `https://onprem.server.website.com`
- **Cloud** - The Appspace URL is the device registration link from the Downloads page.

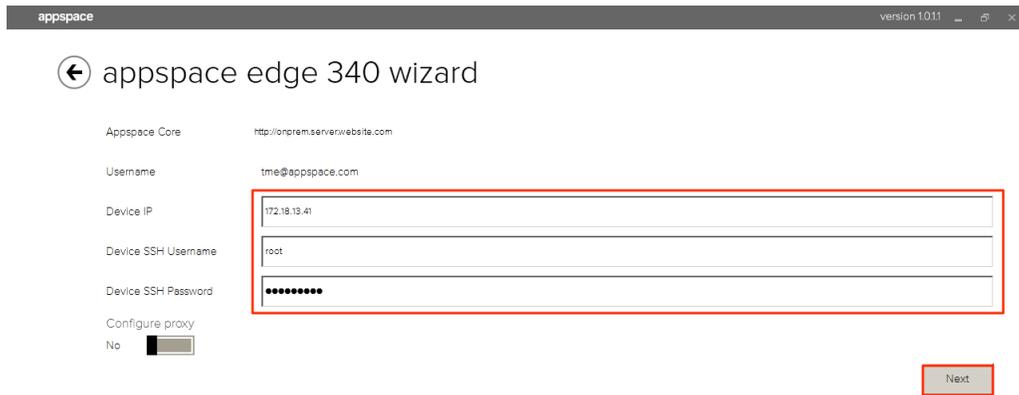

A screenshot of the 'Downloads' page in the Appspace interface. A blue banner at the top contains the text: 'Use this link to register devices to Appspace: <https://www.app1.cloud.appspace.com>'. Below the banner is a search bar with the text 'Search for downloads' and a magnifying glass icon. To the right, there are 'Tags' (None selected) and '9 items'. A table lists the available downloads.

Appspace DMP Wizard Register and configure Cisco DMP 4400 and DMP 4310 devices to sync and run Appspace applications.	5.0.3	wizard dmp	December 1, 2014	Download

Note

When authenticating via Active Directory (single/multiple domain) the Username must be in the format of: short domain name Username

5. Input the device details and click Next.

The screenshot shows a web browser window titled "appspace" with "version 1.0.11" in the top right corner. The main heading is "appspace edge 340 wizard" with a back arrow icon. Below the heading, there are several configuration fields:

- Appspace Core: http://onpremise.service.website.com
- Username: tme@appspace.com
- Device IP: 172.18.13.41
- Device SSH Username: root
- Device SSH Password: [masked with dots]
- Configure proxy: No [checkbox checked]

A "Next" button is located at the bottom right of the form area.

Note

By default, the Edge 340's default SSH credentials are:

- username: root
- password: aDMIN123#

6. The wizard will proceed to register the device.
7. Once registration has completed, a confirmation message is displayed.
